IMPROVE FORAGE QUALITY WITH NEW AZTEROID® FC 3.3

-  **Fertilizer Compatible**
-  **Maximize plant health, yield and quality**
-  **Allosperse® Delivery System**

THE FIRST FERTILIZER-COMPATIBLE FUNGICIDE FOR ALFALFA GROWERS

AZteroid® FC 3.3 maximizes the potential for high quality and high yield after first cutting. It is suitable for extended cutting intervals and reduced lignin varieties. It improves yield by providing systemic disease control that protects new growth and increases plant health benefits. AZteroid FC 3.3 mixes with foliar fertilizer, micronutrients and most foliar insecticides. The new higher concentration formulation reduces the number of jugs to handle, triple rinse and recycle.

PROTECTION TYPE
Fungicide

DISEASES CONTROLLED
Common diseases in alfalfa
Improves plant health

APPLICATION
Foliar

USAGE RATES
3.9-9.7 fl.oz./ac

Plant health benefits include:

- + Quicker green up following a cutting
- + Higher stem counts
- + Better winter survival and stand longevity
- + Improved quality and quicker regrowth
- + Improved drought tolerance
- + Stronger roots and stems to resist weather and pests

"I have never before seen the type of response my customers received from AZteroid FC. It's like AZteroid FC kicks it in the tail and it starts growing."

- John Drake, Center Farm Supply
Center, CO
