PRECISION CHEMISTRY FOR REAL RESULTS

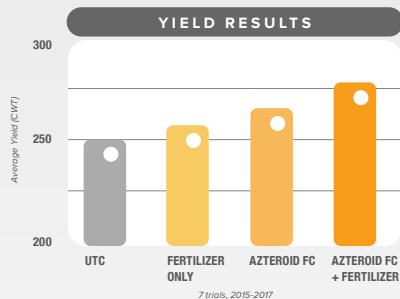

Vive products contain the **Allosperse**[®] delivery system – technology that changes how proven active ingredients behave in the spray tank. You'll have peace of mind that you're getting uniform protection across the field – every time. Through pivots, with liquid fertilizer or hard water, or even a rain delay.

Put a Vive Precision Chemistry product in the tank and forget about it. Simply revolutionary.

CONVENIENT DISEASE CONTROL AND BETTER PLANT HEALTH

AZteroid[®] FC^{3.3}

Average yield increase across all trials = 20.4 cwt/ac

AZteroid[®] FC 3.3 at planting or hilling gets potato crops off to the best start possible with early, uniform emergence and growth. AZteroid FC 3.3 provides systemic and residual control of tough soilborne diseases, yielding larger, more uniform potatoes that are free from disease.

Added plant health benefits:

- + Increased water use efficiency
- + Improved nitrogen use
- + Enhanced photosynthesis
- + Stronger stems resist weather and pests
- + Increased root development
